## Usage of Themis and technical debt - Managers profile

We're Matthieu Foucault, Margaret-Anne Storey, and Xavier Blanc, Computer Science researchers from the University of Victoria and the University of Bordeaux. Our team is investigating how the Themis tool's game-like features help manage technical debt. We'd be grateful if you could help us understand this further by completing the survey below. It should take approximately 20 minutes of your time.

We will openly publish the results so everyone can benefit from them, but will anonymize everything before doing so. Your responses will be handled confidentially.

Please note that you are not obligated to participate in this survey. If at some point during the survey you want to stop, you are free to do so without any negative consequences—the survey data is not saved until you click the Submit button.

Thanks for participating! Please read the following to understand the nature of this research and how we'll manage your data.

### Participant Selection

You are being asked to participate in this study because you are a development manager and an active user of Themis.

#### Risks

There are no known or anticipated risks to you by participating in this research.

#### Renefits

Your participation in this research will help us understand the effect of gamification on software development processes.

### Voluntary Participation

Your participation in this research is completely voluntary. If you do decide to participate, you may withdraw at any time without any consequences or any explanation. If you do withdraw from the study (do not click the Submit button), your data will not be submitted, saved or used in any form. Click the Submit button only if you agree to voluntarily participate.

#### Anonymity

The survey is completely anonymous and we do not require your email address. If you choose to provide your email address, we will use it to contact you for a potential interview and send you the results of our study. Your email address will be removed from the survey data and replaced with anonymous identifiers before the results of this study are published.

#### Confidentiality

The survey data and your identity will be protected by restricted and secure computers located in our research lab at the University of Victoria. Only the research investigators will be able to access the data once it is downloaded from the server that hosts the survey.

Please be advised that this survey may use tools that store data in the U.S. As such, there is a possibility that information about you that is gathered for this research study may be accessed without your knowledge or consent by the U.S. government in compliance with the U.S. Patriot Act.

#### Dissemination of Results

It is anticipated that the results of this study will be shared with others in the following ways: theses, dissertations, published articles or books, presentations at scholarly meetings, on the Internet, and directly to the participants involved (if requested to be notified of results).

### Disposal of Data

Data collected will be disposed of 5 years after the beginning of the study. All survey data collected and backups will be electronically deleted.

#### Contacts

If you have any questions or concerns about this research, please feel free to contact any of the members of our research team: Xavier Blanc (xblanc@labri.fr), Matthieu Foucault (mfoucault@uvic.ca) and Margaret-Anne Storey (mstorey@uvic.ca). In addition, you may verify the ethical approval of this study, or raise any concerns you might have, by contacting the Human Research Ethics Office at the University of Victoria (+1 250-472-4545 or ethics@uvic.ca).

By completing and submitting the survey, YOUR FREE AND INFORMED CONSENT IS IMPLIED and indicates that you understand the above conditions of participation in this study and that you have had the opportunity to have your questions answered by the researchers.

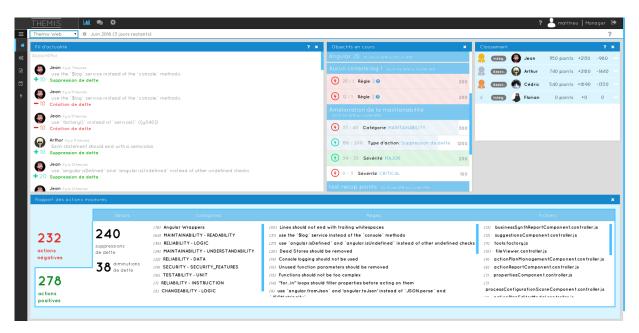

\*Required

## **Opening questions**

1. <b>\</b>	Why do you use Themis? *
	How many hours per week on average did you spend using Themis? *

### Themis usage: Home dashboard

The Home dashboard is the first screen shown when logging into Themis. It uses widgets to display the following information: news feed, leaderboard, current goals, and main actions report.

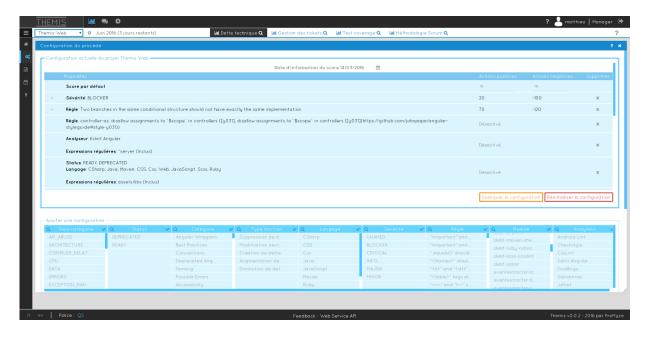

3.	What information do you find useful in the Home dashboard? Please elaborate why. *
4.	What steps do you take based on information from the Home dashboard? *

## **Configurations**

The configuration panel allows you to edit the properties of the process managed by Themis (in our case technical debt). A property of the technical debt process is defined by a set of linter rules and a file filter, and a given amount of positive and negative points will be assigned to the property. This amount will be 0 if the property is disabled, i.e. its linter rules are ignored.

# **Configuration screen**

5. How many times per week on average did you configure process properties for your project? \*

		e points	to attrik	oute to	the prop		n how y	ou deci	ded how many

# **Actions dashboard**

The Actions dashboard shows (for either the overall project or a single developer) the list of actions performed, and contains several charts showing the distribution of actions across hours, days, categories

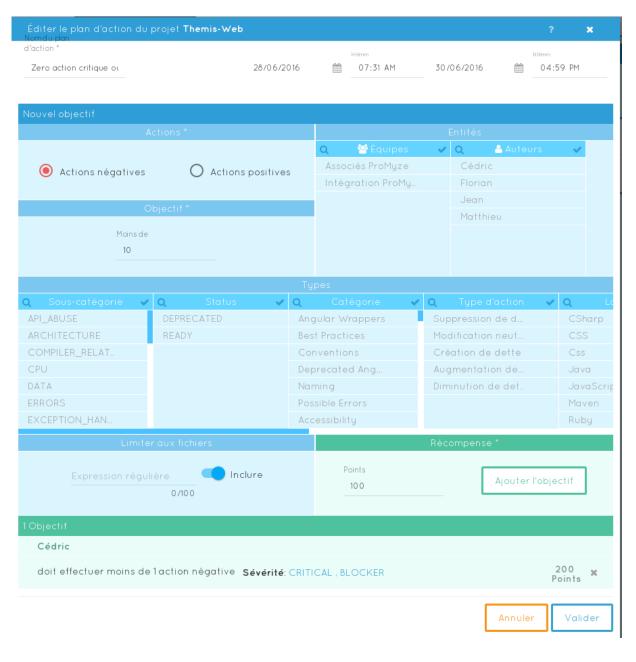

of rules, teams etc.

Creating an action plan allows you to set new goals for the team or specific developers and include a reward for performing more than a given number of positive actions or less than a given number of negative actions, over a set period of time. An action plan contains one or several goals. A goal can target a specific rule, a filtered set of rules, or all rules.

18. How important are action plans for reducing technical debt? \* Mark only one oval.

		1 2	3 4	5 6	7	
No important at all Absolutely Es	No important at all					Absolutely Essential

19.	Explain why.

20.	Did you create action plans? Please give an example of an action plan you created and why you created it. *
21.	When creating a new goal in an action plan, how do you choose between rewarding positive actions or a lack of negative actions? (do not answer this question if you did not create any action plan)
22.	When creating a new goal in an action plan, how do you choose whether this goal should be assigned to a team or a single developer? (do not answer this question if you did not create any action plan)
Us	se of Themis by developers
23.	What instructions did you give to the developers of your team on how to use Themis? *

24.	How did your developers react to the presence of a leaderboard in Themis? *
25.	Do you think the participation of developers to the leaderboard should be voluntary? Please explain why or why not. *
	explain why or why hou
26.	Did you receive comments (positive or negative) from your developers regarding Themis'
	usage? If yes which ones? *
CI	osing questions
27	Do you believe Themis has had an impact on technical debt? And if so, how has it had an
	impact (positive or negative)? *
28.	What are the main challenges you experience using Themis? *

29.	Before using Themis, how did you manage your project's technical debt? *
20	
30.	Did the introduction of Themis affect other tasks in your daily work? If so, how? *
31.	Describe any changes you would like to see made to the tool. *
32.	How old are you? *
	Mark only one oval.
